DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see pages 8-14, filed 6/9/2006, with respect to claims 1-24 have been fully considered and are persuasive. The rejection of claims 1-26 has been withdrawn.

Allowable Subject Matter

2. Claims 1-24 allowable over the prior art.
3. The following is an examiner's statement of reasons for allowance:

The present invention is directed to an apparatus that examines and identifies packets in an MPEG stream that are associated with navigation points, storing the information in and XML and binary file. Independent claims identify the uniquely distinct features, "storing a first component of information on the identified packets in an XML file and storing a second component of information on the identified packets in a binary file."

The closest prior art, Tsumagari et al. (US Pat. No. 6,480,669) and Sezan (US Pat. No. 6,236,395), fail to anticipate or render to the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
